

# ENJOY THE FREEDOM TO **FLY ANYTHING** **ANYWHERE** **ANYTIME!**

With the **LAUNCH VISUALIZER™** you can finally simulate your rocket's flight from your flying site. You'll love 6-DOF, visualizing smoke and fire, seeing the trajectory in 3D, as well as the terrain - allowing you to plan for possible obstacles on the ground that your rocket needs to avoid. It's a lot like being at a real launch... just without all of the applause from your friends.
